

# Do you have experience living with Renal Cell Carcinoma?

We're looking for people with Renal Cell Carcinoma (RCC) who are currently on tyrosine kinase inhibitor (TKI) therapy and carers of people with RCC, to participate in research exploring the experience of living with or caring for someone with this condition.

## What's involved?

We will be conducting virtual interviews with patients and carers. The interviews will take no longer than 60 minutes. They will be conducted over the phone or using teleconference software (like Skype and Zoom). We hope to:

- a) understand the support needs of patients and carers living with RCC
- b) identify gaps in support

If you're interested in taking part and would like to find out more, please get in touch.
